

Dial-a-Pressure Auto-Restart Switch • 4800 psi (330 bar) | SC000315-630B

SKU: SC000315-630B

Price: 2466.98

Description

For use with automatic restart compressors. The user dials-in the maximum pressure desired. When the compressor reaches this defined pressure, the compressor automatically turns off and remains off until the pressure drops about 580 psi (40 bar). At this lower pressure, the compressor restarts and runs until it reaches the maximum pressure desired and then shuts down. The shutdown/restart process continues until the user stops it. Rated for use up to 4800 psi (330 bar).
