

# Brass 1/4" Female Quick Disconnect 1/4" MNPT End

SKU: 6537K63

Price: 26.66

## Description

Open-flow quick-disconnect hose couplings for air and water allow for maximum flow because there is no shut-off valve in the plug or the socket. A complete coupling consists of a plug and a socket (both sold separately) that connect and disconnect quickly. Use them if you need frequent access to a line. All open-flow plugs are compatible with any of the open-flow sockets of the same coupling size, regardless of the pipe size.

Sockets are sleeve-lock style. To connect, slide back the sleeve on the insert the plug, and release the sleeve. To disconnect, slide back the sleeve and pull out the plug.

## Specifications

<b>Coupling Size</b>	1/4
<b>Pipe Size</b>	1/4 FNPT
<b>Maximum Pressure</b>	5200 psi @ 72°F (359 bar @ 22°C)
<b>Temperature Range</b>	-40°F to +250°F (-40° to 121°C)
<b>Hose</b>	Use nylon or rubber
<b>Compatible</b>	Hansen ST couplings, Parker ST couplings, Perfecting E couplings
<b>Note</b>	To ensure a correct fit, make sure that the plug and socket have the same coupling size.
<b>Warning</b>	There is no valve in this coupling. Stop the air and water flow before you disconnect the line.
<b>Cleaned for Oxygen Service</b>	NO
