

# Single Whip Gaugeless Paintball Fill Panel

**SKU:** PN1-ECO

**Price:** ?339.60

## Description

For use with paintball systems. This single fill station is constructed of anodized aluminum and high quality fittings. It is custom built at our California production facility. It can be installed and operated at the paintball field or in a shop. The fill station includes a toggle actuated fill valve that relieves line pressure when released.

Dimensions with fittings, no hose (W×D×H) : 5×5×5 in. Weight: 1.9 lb.

The maximum working pressure is 5000 psi (345 bar). Estimated fill time from 0 to 3000 psi: 35 seconds.

See our [Paintball Accessories Page](#) for hoses and fill adaptors that can be used with our station.

The PN1-ECO is normally in stock and ready for immediate shipment.

Please Note: Fill panels are a gas management tool. Fill panels do not generate compressed air. A source of compressed air is required to fill tanks.
