The Nuvaire four (4) whip fill panel comes in two configurations: PN4 (regulated) and PN4R (fully regulated).

The PN4 Fill Panel Includes

- Stainless steel housing and tubing
- (2) regulated fill lines up to 3000 psi (207 bar)
- (2) unregulated fill lines up to 4500 psi (310 bar)
- (2) gauges
- (1) regulator
- (4) toggle valves with line pressure releases
- (4) rubber weights on fill hoses
- Dimensions: 48×6×10 in (122×15×25 cm)

The PN4R Fill Panel Includes

- Stainless steel housing and tubing
- (4) fully regulated fill lines up to 3000 psi (207 bar)
- (1) gauge
- (1) regulator
- (4) toggle valves with line pressure releases
- (4) rubber weights on fill hoses
- Dimensions: 52×12×12 in (132×30×30 cm)

The PN4 also comes in a non-regulated version ([see SKU PN4-NR](#)). See our [Paintball Accessories Page](#) for hoses and fill adapters that can be used with our station.

All paintball fill panels are custom-made. Please [contact](#) the sales team for estimated lead times.

Please Note: Fill panels are a gas management tool. Fill panels do not generate compressed air. A source of compressed air is required to fill tanks.
