

# O2 Clean Booster Transfer Whip Kit with Analog Gauge

**SKU:** 9530

**Price:** 7850.00

## Description

The Nuair 9530 oxygen (O<sub>2</sub>) clean booster transfer whips with analog gauge works with different gas sources. Includes one inlet and one outlet hose made of green, oxygen clean/compatible thermoplastic SAE100R8 hose with a working pressure of 5075 psi (350 bar). Each hose is four-feet (122 cm) long and is outfitted with stainless steel hose ends.

The inlet hose includes a bleed valve and three quick disconnect inlet adapters for different supply gases:

- DIN 300 (air)
- CGA540 (oxygen)
- CGA580 (inert gas)

The outlet hose is equipped with a brass in-line 6000 psi (414 bar) on/off valve followed by a stainless steel tee with a 5000 psi (345 bar) analog gauge and a hand tight DIN 200/DIN 300 fill adapter. All connections and hardware are ready for oxygen service.
