

O2 Clean Stainless Braided Transfer Whip Kit with Analog Gauge

SKU: 9534

Price: ?625.00

Description

Intended for use with a booster pump, the stainless steel braided inlet hose has a hand tightened CGA540 adapter with a built-in sintered filter followed by a bleed valve. The stainless steel braided outlet hose has all stainless steel fittings with a brass on/off valve followed by a stainless steel tee with a 5000 psi (345 bar) analog stainless steel gauge and a 200 or 300 DIN fill adapter. Hose package includes a BC connect fitting for air inlet from your SCUBA tank via regulator and BC fill hose. Both hoses rated for 3000 psi (207 bar).
