

Teledyne AN300 Nitrogen Analyzer • Discontinued

SKU: AN300

Price: ?0.00

Description

The AN300 is no longer produced by the manufacturer and is out of stock. The Nuvair Pro N₂ Alarm ([SKU 9613](#)) is a suitable replacement.

The sensor for the AN300 incorporates a N-33 micro-fuel cell sensor for quick and accurate analysis of nitrogen. This maintenance-free, sealed, electrochemical cell is specific to nitrogen (N₂), insensitive to flow rate, and has a 90% response in less than 10 seconds. At the end of its life, the cell is discarded and replaced.
