

# THE POCKET • Remote Control Fill Panel

**SKU:** PN-POCKET

**Price:** ?0.00

## Description

With a pocket measuring only 6-inches square, this stainless steel gem is a compressed gas multi-function marvel. Designed to be an all-inclusive solution, THE POCKET gives compressor users remote access and control to high-pressure gas. THE POCKET includes the following components:

- Two Quick Disconnects
- Circuit Bleed Valve
- Emergency System Stop Button
- Hour Meter
- Pressure Gauge

Custom made at our California production facility, THE POCKET can be equipped with a number of options, including:

- High- or low-pressure configuration
- Brass, stainless, male, and female quick disconnects for scuba, paintball, or fire service
- Custom pressure gauges for any application
- Alternate gases, including enriched air nitrox, with

THE POCKET is a perfect addition to private yachts, dive boats, fire apparatus, paintball retailers, and dive shops... basically any location where remote, reliable access and control to compressed gas is required where available space is at a premium.

All Nuvair fill panels are custom-made at the time your order is placed. Please [contact](#) the Nuvair sales team to discuss THE POCKET options and capabilities.
