

Air Dryer: 220 V, 60Hz, 22 CFM, 6000 psi

SKU: SC0001300-60HZ

Price: ?3,700.00

Description

This final high pressure air dryer is positioned between the final compressor stage and water separator. The compressed air is cooled down inside a closed cooling circuit. As a result, the dewpoint of the compressed air decreases and most of the moisture and oil contained condenses and is removed by the oil and water separator. Other benefits include:

- Increases filter life—up to 5 times longer
- Improved air quality
- Less corrosion on internal mechanical parts
- Cylinders recharge with a constant humidity percentage

Specifications

Flow Rate	Maximum Operating Pressure	Power	Tube Connections	Weight
22 CFM (623 L/min)	6000 psi (414 bar)	220 V / E3 / 60 Hz	8mm	110 lb (50 kg)
