

10-Port 4-Whip Fill Block with Valve

SKU: PN-GO310

Price: ?1,200.00

Description

Our 10-port fill block fills four (4) tanks simultaneously. The block is made from hard anodized aluminum 6061-T6511 with 1/4" FNPT ports and is rated to 6000 psi (414 bar). Includes:

- One (1) open/close regulator with #4 JIC hose connection
- One (1) pressure gauge
- Four (4) four-foot (122 cm) fill whips and steel fittings
- Four (4) Fill valves of your choice: INT (yoke), DIN 232*, DIN 300, SCBA 346, SCBA 347, or Custom

This 10-port manifold is expandable by adding (3) additional fill whips or by daisy-chaining additional manifolds.

*Also commonly referred to as DIN 200 in the USA.

This product is custom-made upon order at our California production facility, which may result in extended lead times. If a rush order is required, please [contact](#) the Nuair sales team for estimated lead times.

Please Note: Fill blocks are a gas management tool. Fill blocks do not generate compressed air. A source of compressed air is required to fill tanks.
