

Nardi Atlantic Gasoline Compressor Filter Cartridge

SKU: AT149-102

Price: ?70.80

Description

The filtering systems and filter cartridges manufactured by **NARDI COMPRESSORI** are designed and produced for optimized efficiency and for maximum safety.

NARDI COMPRESSORI filters and cartridges purify air and any compressed gases by removing water and oil remnants, along with any odors that might pass through external mechanical separators. **NARDI COMPRESSORI** filters are equipped with an internal mechanical separator which spin-dries air and eliminates liquids prior to entry into the filter cartridge intake.

All filters have a maintenance valve to ensure maximum contact of gases with the absorbing materials. This procedure guarantees conformity with breathing air standards DIN EN 12021:2014.

The all-aluminum filter cartridge body contains two felt disks to remove larger particles, molecular sieve (MC) to adsorb water vapor, activated carbon (AC) to eliminate oil vapors and odors, and hopcalite (HO, considered optional, but generally required for gas-powered compressors) to convert carbon monoxide (CO) to carbon dioxide (CO₂).

All cartridges are vacuum-packed and sealed to ensure integrity of the drying material from external contaminants while in storage.

Nardi Compressori OEM/Distributor

Nuvair offers authentic parts and equipment manufactured by Nardi Compressori. Beware of inexpensive aftermarket imitations labeled as "replacement," "OEM equivalent," "compatible," or "alternative," as they are not made by Nardi Compressori Srl. Due to size, weight, or specific requirements, some Nardi products may not be available for online purchase, and others may have extended lead times. To confirm compatibility with your

existing equipment or to ensure the product meets your needs, please [contact the Nuvair Sales Team](#) for ordering assistance by email or phone.
