

NSS 2-Cylinder OCA Fill Containment Station

SKU: NSS-2P-OCA

Price: ?0.00

Description

The Nuair NSS Fill Containment Station Series is designed for use while filling high-pressure gas cylinders (DIN, yoke, or SCBA). The fill containment station's (also referred to as a "blast cabinet" or "fragmentation cabinet") all-steel construction offers protection for operators during the cylinder filling process. The optional heads-up control panel allows monitoring and adjustments from a standing position. The cabinet is third-party tested to meet or exceed NFPA 1901. Vertical blast tubes direct air blast and debris away from the operator should a failure occur. The NSS Series of Containment Stations can fill 1–5 cylinders simultaneously.

Standard Features

- All steel construction
- Grade 8 steel structural hardware
- Third party tested to meet or exceed NFPA 1901 standard
- Ergonomic design for easy operation
- Heads-up control panel allows monitoring and adjustments from a standing position
- Vertical blast tubes direct air blast and debris away from the operator should a failure occur
- Designed to fit all SCBA sizes
- Lined blast tubes reduce wear to SCBA cylinders
- 2216, 3000 or 4500 psi fill pressures
- Dual bank storage valves and pressure gauges
- Regulated fill pressure with unregulated and regulated pressure gauges
- Safety relief valve for each fill pressure
- Individual tank valves and pressure gauges
- Open door safety shutoff

Options

- Available fill devices:
 - DIN
 - International (yoke)
 - SCBA
- Auxiliary bulkhead fill connection
- SCUBA blast tube(s)
- Low pressure (shop air) outlet

Specifications

Model	Cylinders	Door Operator	Filtration	Single/Dual Pressure	Approximate Weight	Approximate Dimensions (L x W x H)
NSS-2P-OCA	2	Pneumatic	OCA	Single or Dual	560 lb (254 kg)	25 x 26 x 59 in (64 x 66 x 150 cm)
