

Compressor Auto Drain Assemblies

SKU: 6050

Price: ?1,137.38

Description

Auto drains automate the compressor condensate draining process. This optional compressor feature eliminates the need for an operator to manually drain the compressor every 10 to 15 minutes. Improper condensate drain practices may lead to diminished filter life, increased operation temperature and compressor damage due to water accumulation in the compressor stages resulting in hydraulic backwater failure.

Auto drains are easy to maintain and operate. Single-, double-, triple- and quad-stage auto drain versions are available for compressor systems with one or more coalescing towers. Additional auto drain configurations are available. Please [contact the Nuvair sales team](#) for assistance with ordering your custom auto drain assembly.
