

Christo Lube Alternative for Reciprocating Compressors

SKU: MCG-1011RP

Price: ?0.00

Description

Description

Fully fluorinated oil which operates under extreme temperature conditions, has outstanding stability with oxygen and excellent compatibility with metals, plastics and elastomers. This medium viscosity PFPE oil is especially useful in lubricating plastic and elastomer components commonly found in automotive applications. Formulated with corrosion inhibitors for protection of metal parts.

Specifications

Description	Value
Type	PFPE
Color	Colorless
Temperature Service Range	-30 to 260°C (-22 to 500°F)
Flash Point (°C) (ASTM D-92)	None
Evaporation (CTM-1) 24h @ 149°C (300°F)	0.0103%
Evaporation (CTM-1) 24h @ 204°C (399°F)	0.99%
Specific Gravity (CTM-2) @ 25°C (77°F)	1.91
